Dear Bryan, Tim, and Laurel,

On behalf of the patients, faculty, and staff of the Sidney Kimmel Comprehensive Cancer Center at Johns Hopkins, I want to extend our sincerest thanks for your generous support of Dr. Arlene Forastiere's research. Our dedicated researchers and clinicians lead the world in translating cancer discoveries into cancer medicine, and this success has been fueled by the generosity of donors like you.

Your giving is transformative in a time of unprecedented opportunity, ensuring that we can continue to conceptualize and advance the next pivotal breakthroughs in cancer medicine. Innovative research conducted here at the Kimmel Cancer Center goes beyond the state-of-the-art, delivering unprecedented treatment breakthroughs for even the most challenging cancers. These advances herald a future in which doctors will be able to save lives and spare suffering by thwarting cancers with the fewest possible side effects, utilizing treatments that precisely target the malignant cells and leave normal, healthy cells unharmed.

Your commitment to the Johns Hopkins mission allows us to ensure that each patient receives the best possible treatment at exactly the right time. All of us here at Johns Hopkins Medicine are fortunate to call you a partner in our endeavors to conduct influential research, translate discoveries into cutting-edge patient care techniques, and train the next generation of emerging physician-scientists.

Sincerely,

William Nelson, M.D., Ph.D.
